Dopaminergic Regulation of Relapse-Dependent Glutamatergic Plasticity

Sade Spencer

Department of Neuroscience, Medical
University of South Carolina

Dr. Spencer will present her modified cue-cocaine relapse model and the alterations in transient synaptic plasticity associated with relapse observed in the nucleus accumbens.

Thursday

October 5, 2017

4:00 p.m.

Preston Research Building 206

This lecture series features the most promising young scientists who are making notable discoveries as postdoctoral fellows or early career faculty.
